Sitting @ Stone Crest hospital with my husband while at work this morning he had another spell or (mini stroke) He picked up an order from Home Depot in Smyrna. after he left one of the workers from Home Depot called my husbands boss (Gordon Lee) and said something was wrong with John so Gordon called my husband and told him to pull over. Gordon called the police and they called EMS as soon as they seen my husband. my husband had EMS call me to tell me where they were taking him. They also said it looked like he might be having a stroke and they were taking him to Stone Crest Hospital in Smyrna.

When I arrived at The hospital my husband looked bad he was very confused the right side of his face was drooping and he was having trouble moving his right leg and arm. The look on his face you could tell he was very scared. They took him down to run some test he was gone for a long time when he came back there was a male nurse taking care of him. shortly after they brought him back his nurse came in and said they were going to discharge him and all the test came back fine.

I could not believe they were going to let him go. I told the nurse he was not going anywhere and I wanted to see The Doctor. When the doctor came in he told me they were not releasing him and they found a clot in his head and they were taking him to have surgery. a few minutes after that the nurse came back in. Told me to help him get dressed and he would be right back with his discharge papers. at This point I was getting very mad. Know one seemed to know what they were doing. I asked to see The Doctor again it took a long time before he came back. he said they were sending him to another hospital where they were better to take care of him. many hours went by waiting for EMS to come get him. when they did they took him to Centennial Hospital. when he got there they started doing more test right away. when they were done Doctor Valdivia the head Neuro doctor at Centennial came to talk to me. he kept said he was sorry that Stony Creek hospital did not do what they should have. telling me he had a stroke and to much time had passed for them to do anything. he was very upset, a little while later

Doctor Valdivia came back saying he
could not go home without trying something
to help him when they were done the doctor
told me to never take him to Stone Crest
hospital again and please don't take him to
see Doctor Eboji again. That both Doctors could
have helped him and know one did anything.
